

Poly-urethane Bushed Motor Mount Assemblies

Small Block Ford

Features

- Small block and big block mounts available
- Captive mounted poly-urethane bushing
- Fore/aft position adjustable within 1/2" range
- Double-shear, through-bolt design
- Zinc plated components and hardware
- Replacement bushing and sleeve sets available

TCP MM-FD-03
Replacement Bushing Set
Includes : 4 bushings, 2 sleeves

Our poly-urethane bushed motor mount assemblies provide a high performance, direct replacement alternative to bonded rubber factory mounts and are available for small block and big block applications. A unique, double-shear, through-bolt design eliminates any chance of motor mount separation during normal use. Shims allow the fore/aft position of the motor to be varied within a 1/2" range centered at the stock position. The mount features graphite impregnated poly-urethane bushings with seamless internal sleeve and external housing. Transferred vibration is increased over factory levels but without the harshness commonly found using completely solid mounts.

Model	Year
Comet	1960-1965
Cougar	1967-1970
Cyclone	1964-1965
Falcon	1960-1965
Mustang	1964-1970
Ranchero	1960-1965

The welded assembly features heavy-duty motor plates (Big Block 1/4" thick, Small Block 3/8" thick) with a 3/16" wall, tubular bushing housing. Frame adapter plates are 1/4" thick with slotted motor mount holes to make allowance for chassis variances and simplify installation. All mounting hardware is grade 8 and included.

Part Number	Engine Family	Specific Block	Price
TCP MM-FD-02	Windsor	260, 289, 302, 351W	\$209 ⁰⁰
TCP MM-FD-02	Cleveland	351C, 400	209 ⁰⁰
