

VR-Series Coil Springs and Components

VR-Series Progressive Rate Front Coil Springs and Components for Early Mustangs and Other Fords

Urethane Spring Isolators

VR-Series Coil Springs

Lower Spring Rockers

VR-Series coil springs are silver-powder-coat finish for a lasting, quality appearance.

VR-Series Coil Springs

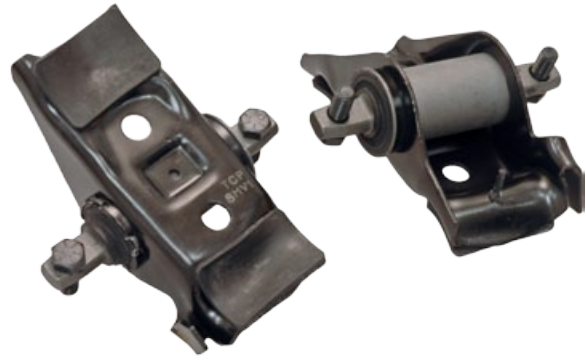

Total Control's new VR series of progressive rate coil springs offers you the best way to get the ride and handling you want for your classic Mustang. The unique design advantages of progressive springs provides a stock like, but firm ride during normal driving. As your vehicle is driven harder, the suspension will travel into the higher-rate range of the spring, providing increased stiffness and handling performance improvement. Made from high strength alloy steel and wound on a specialized CNC spring coiler, VR springs are the best you can buy. VR-Series springs provide the stock vehicle ride height and can be trimmed to achieve a lower stance. Silver-powder coated for a lasting appearance. Available for 1964 to 1966 Mustang with small block, and 1967 to 1973 Mustangs with small- or big-block. Sold in pairs.

Part Number	Application	Rate Range	Free Length	Top	Bottom
TCP SVM1-SP	1964-66 Mustang, small block	400-550 lb/in	12-7/8"	Ground	Open
TCP SVM2-SP	1967-73 Mustang, small block	410-560 lb/in	14-1/2"	Ground	Open
TCP SVM2-BP	1967-73 Mustang, big block	475-725 lb/in	14-1/2"	Ground	Open

Complete applications chart on reverse side.

Lower Spring Rockers

Replacement lower spring-seat rockers for the upper control arms are available. Made from all new materials they feature rubber pivot bushings and lower spring isolators. Sold in pairs.

TCP SVM1-02 - Lower spring rocker set, rubber bushings

Upper Spring Isolators

Our coil-spring isolator is required with all VR springs. The coil-spring wire is a different size than stock so the original isolator will not fit correctly. Made from high strength black polyurethane for long life. Sold in pairs.

TCP SVM1-01 - 1/4" thick spring isolators, black urethane, standard height

TCP SVM1-03 - 1" thick spring isolators, black urethane, raises ride height approximately 1-1/4"

Model	Year	VR-Series Coil Springs		Lower Spring Rockers	Spring Isolators	
		Small Block	Big Block		1/4"	1"
