

Tie-Rod Adjuster Sleeve Sets

Heavy Duty Billet Tie-Rod Adjuster Sleeves with or without Tie-Rod Ends

Our heavy duty billet tie-rod adjuster sleeve directly replaces the factory stamped steel, split tube design. The seamless sleeve features a 1" hex to facilitate precise toe adjustment and tightening of the zinc plated jam nuts. Left-handed threads are indicated by offset position of the sleeve hex and yellow zinc coating on jam nuts. A 50% greater wall thickness and a 40% larger thread contact area provide improved strength over the factory design and eliminate any sleeve deflection. Internal threads extend 1-3/4" to a centered stop enabling a total adjustment range of 2-1/8".

Features

- Direct replacement for OEM stamped steel, clamp design
- Seamless sleeve with 50% greater wall thickness over OEM components
- Over 2" adjustment range
- Common 1" hex for sleeve and jam nuts
- Available as sleeves only or with tie rods

Applications

Model	Year	Adjuster Sleeve Only*	Billet Sleeve with Inner & Outer	
			For OEM Spindle	For TCP Spindle

Footnotes				
All	Not for use with Granada spindles.			
*	Verify each shaft diameter and sleeve length prior to ordering. (Shaft = .688"; sleeve = 4.7")			
1	Installation requires TCP rack and V8 spindles			
2	V8 with OEM manual steering			
3	Excludes: Boss Mustang, Police/Taxi Montego			

All prices subject to change. Current pricing available at www.cachassisworks.com.
